Featured Work Projects

Sentiment Watcher

An application for data monitoring and sentiment analysis that collects information from various social media platforms about trends and engagements. It uses AI to analyze the data to generate statistics and assess public opinion.

Greentrait

An advanced software that helps doctors safely integrate cannabis into patient care by providing tools to manage medication interactions. It offers real time analysis and alerts for drug-cannabis and drug-drug interactions.

Medtrait

A pharmacogenetic-guided clinical report solution that helps healthcare providers make better prescribing decisions by integrating genetic data, drug interactions, demographics, and lifestyle factors. Developed using Next, ASP.net.

Muse Square

A platform for managing art galleries and exhibit rentals, browse and book venues for art shows, exhibitions, and other events across Paris. Developed using Wordpress, Vue, Magento.

Empire East

The official website of Empire East Land Holdings Inc. Developed using PHP, jQuery

Skills

Programming Languages

JavaScript, Typescript, Java, C#, C++, PHP, Python

Libraries & Frameworks

React, Next, Node, Vue, React Native, Selenium, Tailwind CSS, Net framework, PyTorch, CodeIgniter, Langchain, Huggingface

Tools & Platforms

Git, Docker, VS, WordPress, Magento, Figma, Google Cloud, Android Studio, LM Studio

Education

Rizal Technological University

Bachelor of Science in Information & Communication Technology
